KEEP OUT OF REACH OF CHILDREN

CAUTION

- This labeling must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

ROTATIONAL CROP INFORMATION

Gowan Company recommends the following recropping intervals for crop safety. Planting prior to the intervals shown below may result in crop injury when using Sandea herbicide. Rotation intervals below may need to be extended if drought or cool conditions prevail. Gowan recommends that the end user test this product in order to determine its suitability for such intended use. In the event of crop failure, labeled crops may be planted back into the treated area at the user’s risk for potential phytotoxicity to the subsequent crop. When using Sandea in tank mixes, refer to the individual product labels being tank mixed. To determine rotational crop restrictions follow the longest rotational limitation of the product being tank mixed.

CROPS

Broccoli, Cabbage, Cauliflower, Lettuce crops and Radish

TIME INTERVAL BEFORE PLANTING

Planting of the above crops may occur 3 months after application but only in muck soil areas of Florida.
